

District School Design Focus Groups for Newly Proposed Facilities: Start-Up Sessions
Grand County School District
August 2008
Updated July 16, 2008

The purpose of meeting in focus groups is to provide facility architects with ideas for construction of our new buildings. Keep in mind that our job is to provide input. The resulting design will reflect this input based on feasibility and cost.

Community members and staff are invited to attend any focus group. The ‘initial invitation’ column below reflects staff members who have either expertise or a stake in the issue. If your name is not showing on this list, please call Becky McCormick (259 – 5317) to reserve a spot. Again, everyone is invited to join any focus group based on his or her areas of interest.

Additional input regarding classroom design, vocational center design and general facility design will be arranged via each building principal. Community members wishing to attend sessions on these topics, please contact individual principals/directors. (High School Principal Hren at 259 – 8933; HMK Principal Farnsworth at 259 – 7350 and Red Rock Principal Buckingham at 259 – 7326.)
